PROFESSIONAL SUMMARY

Software Engineer with nearly 4 years of experience building scalable backend systems and cloud infrastructure, specialising in Golang, Python, and Google Cloud Platform. Promoted to Senior Software Engineer within a year at HYPR4, recognised as Employee of the Quarter for Q3 & Q4 2025–26. Hands-on experience spanning GCP platform engineering, data pipeline development, team leadership, and AI-enabled data governance. Holds Google Cloud Associate Engineer and MongoDB certifications.

TECHNICAL SKILLS

Languages: Golang, Python

Backend: REST APIs, Microservices, WebSockets, FastAPI

Databases: MongoDB, PostgreSQL, MySQL, Redis

Cloud & Infra: GCP, Terraform, Docker, Cloud Run, Cloud Functions, CI/CD, GitHub Actions

Data Engineering: Prefect, DBT Cloud, Airbyte, Fivetran, Pub/Sub, Pandas, Polars, PyArrow, BigQuery, Datalake

GCP Specialisation: Analytics Hub, VPC Service Controls, Workforce Identity Federation, IAM, PAM, Looker

AI & Governance: LLMs, Knowledge Graphs, Data Governance

Integrations: Stripe, Plivo, Zoho

Version Control: Git, GitHub

OS: Linux, Windows

WORK EXPERIENCE

HYPR4 Cloud Tech

Aug 2024 – Present

Employee of the Quarter — Q3 & Q4, 2025–26

Senior Software Engineer

Jul 2025 – Present

Promoted based on Viasat GCP platform leadership

Viasat GCP — Enterprise Cloud Platform [Platform Lead] [2025–2026]

- Led GCP platform engineering for Viasat, owning infrastructure design and guiding a cross-functional team of 5 (2 platform + 3 data engineers) across identity, ingestion, pipeline orchestration, and governance. Initiated Jan 2025, continued post-promotion.
- Implemented Workforce Identity Federation (Okta–GCP), cross-org Analytics Hub access, IAM policies, VPC Service Controls, and secret management — all provisioned and managed via Terraform.
- Built and managed the full ingestion layer — configured Airbyte and Fivetran for MongoDB, ServiceNow, and MSSQL sources; developed custom Python + PyArrow pipelines for SAP and Oracle DB, deployed on Cloud Run and orchestrated in Prefect. Reduced SAP delta sync runtime by more than half (4.5 hrs → ~2 hrs) and significantly cut full-extract storage footprint.
- Delivered a data governance framework POC and Looker-powered demo dashboards, establishing the foundation for enterprise data observability.

Sriffin — AWS-to-GCP Migration [Project Lead] [2026]

- Led AWS-to-GCP migration for Sriffin, taking over a stalled project and driving performance optimization across Cloud Run, Cloud SQL, Cloud Functions, and Cloud Scheduler for 100–200 concurrent users.
- Migrated data from AWS (RDS, Lambda, Glue, Athena) to GCP — built Cloud SQL to BigQuery transfer jobs, converted JSON to Parquet, and optimized BigQuery tables using clustering and partitioning.
- Reduced monthly infrastructure costs by ~30% (₹5.5L → ₹3.7L) through right-sizing, workload tuning, and architecture improvements; drove go-live and production stabilization.

Unicommerce — Analytics & Reporting Platform [Team Lead] [2025]

- Led a team of 3 to build raw-layer data extraction pipelines in Go and clean/curated transformation pipelines in Python (Pandas, Polars, PyArrow, Pub/Sub), outputting optimised Parquet files.
- Delivered analytics dashboards backed by the curated Parquet layer, enabling business reporting across key metrics.

TechnoServe — Unified Dairy Data Platform [Dev Lead] [2026–Present]

- Leading a team of 4 to architect and build a unified data governance platform for the dairy sector on Azure using Muxy components, FastAPI, and React.

- Designing governance workflows, metadata management, and data cataloging architecture; developing custom backend services and reporting APIs across multiple data domains.
- Establishing scalable governance and reporting operating models in collaboration with cross-functional stakeholders.

H4 Internal Platform [Backend Developer] [2026–Present]

- Led MongoDB → PostgreSQL migration — designed schema, planned data transfer, and ensured zero data loss cutover; implemented RBAC across all Go microservices.
- Integrated Zoho for HR workflows and developed new feature modules on the migrated PostgreSQL stack.

Muxly — Data Governance & AI Platform [Developer] [2026–Present]

- Designing and building Muxly, an enterprise data governance and AI-enabled data operations platform.
- Developing knowledge graph construction pipelines to model relationships across enterprise data assets.
- Building AI-powered chat on data sources using Gemini LLM integration, enabling natural language querying of governed data.
- Implementing governance modules including data registry services, metadata management, and access control workflows in Go.

Software Engineer

Aug 2024 – Jun 2025

Fikrm & Protean ONDC CAAS [Backend Developer] [2024]

- Contributed to backend development across a document storage platform (Fikrm) and ONDC commerce platform (Protean) — building microservices, REST APIs, and adapting backend logic to client requirements using Go and MongoDB.

Fission Infotech

Nov 2022 – Aug 2024

Junior Software Engineer

Nov 2022 – Aug 2024

LeadsWatch — Lead Management SaaS [Backend Developer] [2023–2024]

- Built the full backend for a lead management SaaS — Go APIs with Gorilla Mux and MongoDB, Stripe subscription billing, Plivo SMS alerts, and WebSocket-based live updates.
- Owned end-to-end development from schema design and API architecture to third-party integrations and real-time features.

ACHIEVEMENTS

Employee of the Quarter — Q3 & Q4, 2025–26 · HYPR4 Cloud Tech

LeetCode — 800+ problems solved

CERTIFICATIONS

Associate Google Cloud Engineer — Google

SI Associate Certification — MongoDB

SI Architect Certification — MongoDB

EDUCATION

Master of Science (Mathematics with Computer Science)

2020 – 2022

Osmania University · CGPA: 8.5

Bachelor of Science (Mathematics, Statistics, Computer Science)

2017 – 2020

K V Ranga Reddy Degree College for Women · CGPA: 9.6
